

# Benchmarking cerebellar organoids development and their use to model autism spectrum disorders

**Dr. Davide Aprile**  
*Neurogenomics center  
Human Technopole, Milano (IT)*

**Thursday June 8<sup>th</sup> at 12.00 noon**  
***Aula Mosca***  
***via Forlanini 14***

Dr. Aprile will present a comparison between bulk and single-cell transcriptomics from cerebellar organoids and the human cerebellum in development; he will also discuss the use of such organoids to model autism spectrum disorder of genetic origin.
